SiteWorks: Release Note

Contact Form 1.1.1

5 Septembert 2024

This update provides a enhancement that provides the ability to use two or more contact forms across a site. While this was originally developed for regional or similar sites that have sub-sites, it is recognised that this could be beneficial across all SiteWorks sites, to provide a degree of customisation, for example between contacting a group leader or committee member, hence its release across all SiteWorks sites.

Summary for Website Administrators: The 1.1.1 version of the u3a SiteWirks contact form, will permit a web manager to provide a number of customised contact forms within a single site. This will be beneficial to a Regional, Network or similar site that provides "sub-sites" for smaller u3as or groups. This feature may also be useful in a regular SiteWorks site if the web manager wants to have different content on the contact page depending on who is being contacted. *The change will be documented in both the training and user guides.*

Release Consists of the Following Plugins

Compatible with: WordPress 6.6.1 **Theme:** u3a SiteWorks 1.9.8

Plugin	Version	Plugin	Version
Gutenslider§	6.1.0	Imsanity§	2.8.4

u3a SiteWorks WordPress configuration	1.1.1		

§Third Party Software Plugins, version numbers outside the control of SiteWorks

†Should not be activated, see Known Defects or Limitation.

New Features, Enhancements or Bug Fixes.

Plugin	Summary of Reason
Contact Form	# 1071. Enhancement to the Contact Page plugin. The contact form plugin currently only supports a single pre-defined contact form page. For a Region or similar site that provides "sub-sites" for smaller u3as or groups, a proposed enhancement would allow a separate contact form page be used for the each individual sub-site. It is recognised that this feature may also be useful in a regular SiteWorks site if the web manger wants to have different content on the contact page depending on who is being contacted.
	The approach adopted is to extend the [u3a_contact] shortcode to allow an additional optional parameter of "slug", which would be the page slug of the page that is used to trigger the contact form page for a specific contact.
	For example: [u3a_contact name="Secretary" email = "sec@example.com" slug="slug-of-page"]
	The deforlt shortcode will not change.

Known Defects or Limitations

LiteSpeed Cache: This is an ongoing issue, currently the plugin should not be activated. Detailed in OpenProject #972, Change Board Minute 11.

Release Dated: 12 September 2024
