SiteWorks: How to retrieve your Site Builder export

On Local, click the big green + Screenshot 1 and then the Zip option Screenshot 2.

Screenshot 2

=	Local		– 🗆 ×
		Create a site	×
		Create a new site Spin up a new WordPress or headless WordPress site. Create from a Blueprint Start a new site with pre-installed elements like plugins and themes. What's this?	
		Select an existing <u>ZIP</u> or drag your file into the window to import a site. Need a fast, free way to create a <u>ZIP</u> archive of your site? <u>Try WP Migrate</u> .	Continue
Dra	ag ai	nd drop you Zip file into the area indicated the click on continue.	

After the website has imported you can launch the website (**Open site** button) or to log in as the Administrator (**WP Admin** button).

If you are prompted to login use:

Username: admin Password: 112233

You can switch on One-click admin if you haven't already dine so.
