

SiteWorks: How to set up and see column blocks

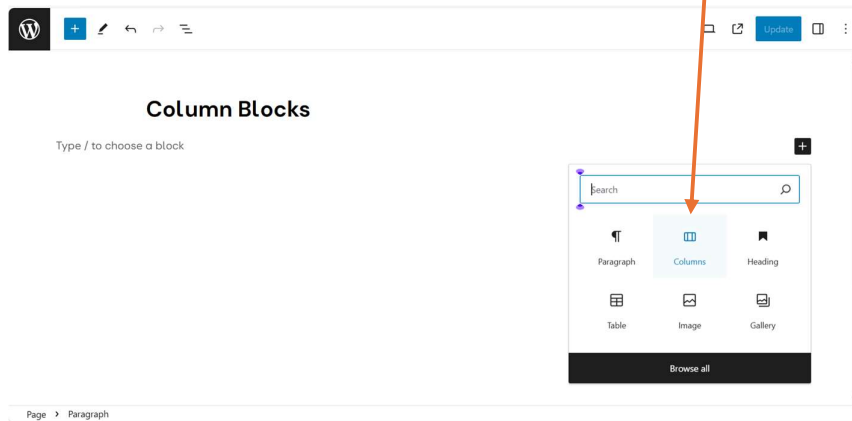

Screenshot 1, I am working on a page called Column Blocks. I click on the + sign to add a block as usual.

Screenshot 1

Screenshot 2 from the popup menu I select Columns option, (if I don't see it I can either scroll or Search to call the option up).

Screenshot 2

Screenshot 3 the Columns variations menu opens .
Screenshot 3

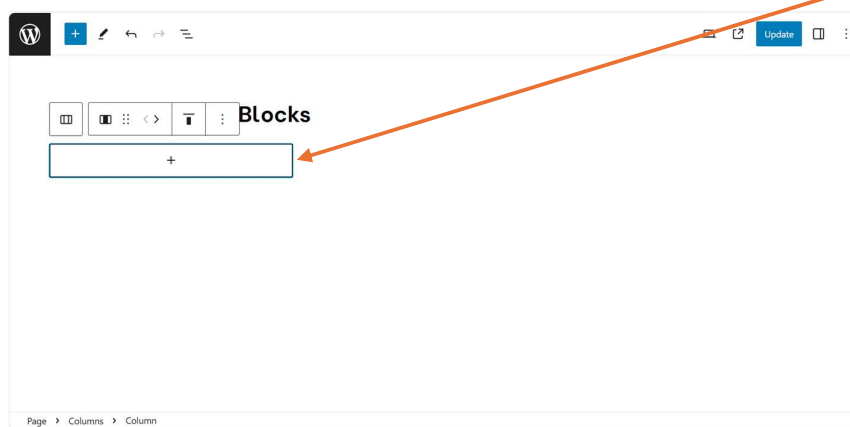

Screenshot 4, I am selecting the 33/33/33 variation. (In the workbook it's 33/66.)

Screenshot 4

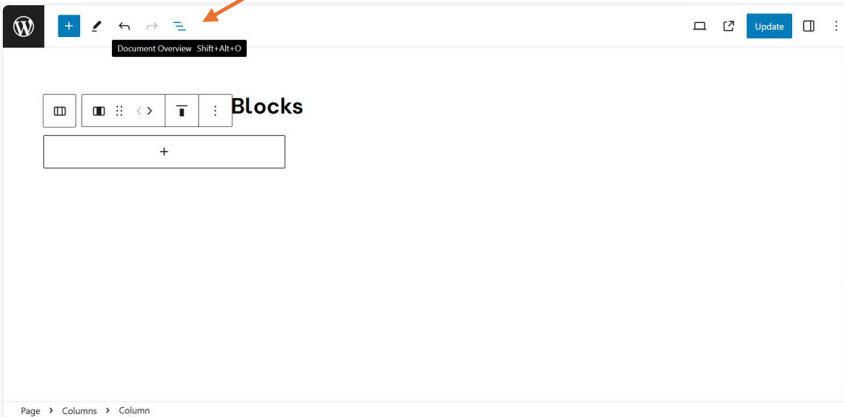

Screenshot 5, the Column block has been added to the page, but I can only see the first Column.

Screenshot 5

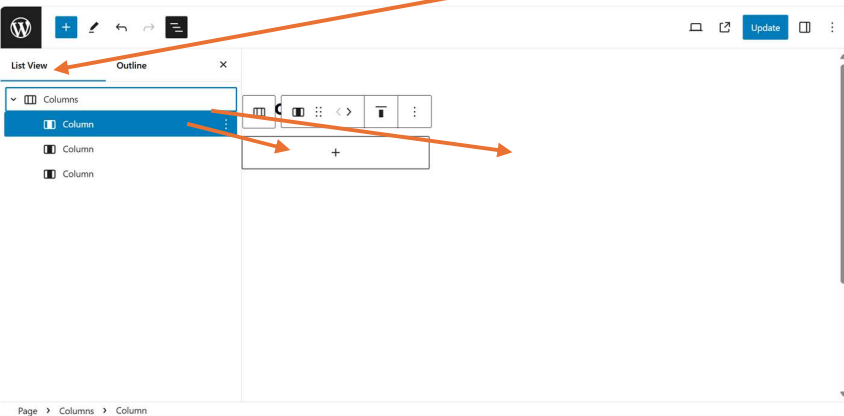

Screenshot 6, I go to Document Overview (also called the Hamburger menu) on the top menu then click.

Screenshot 6

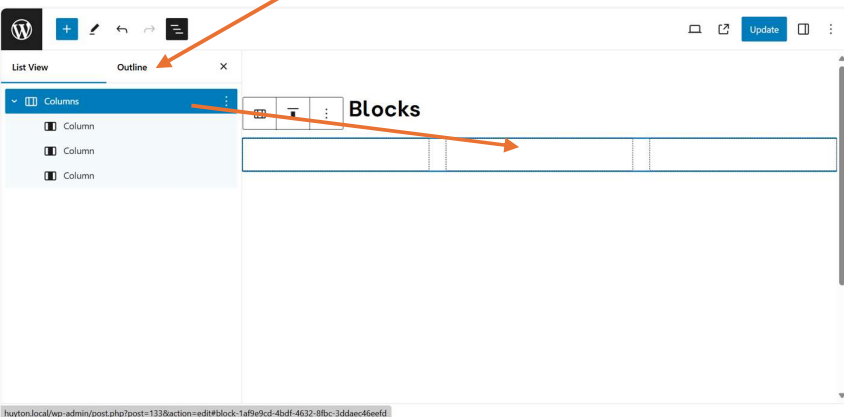

Screenshot 7, a side menu with a List View appears. It shows the Column block with the first Column selected.

Screenshot 7

Screenshot 8, when I click on Columns, which is the actual Column block, all the Columns in the block become visible.

Screenshot 8

Screenshot 9, 10, 11, when you click an individual Column in the list view, it becomes visible on the page.

Screenshot 9
