| <a href="#">u3a SiteWorks WordPress Configuration</a> | <a href="#">1.1.3</a> |   |                       |

<sup>§</sup>Third Party Software Plugins, version numbers outside the control of SiteWorks

<sup>†</sup>Should not be activated, see Known Defects or Limitation.

### New Features, Enhancements or Bug Fixes.

| Plugin        | Summary of Reason   |
|---------------|---|
| Configuration | #1078: It was possible for a user who had been assigned (by an administrator or an editor) as the author of a "Page" to delete that page. This capability is now removed.   |
| Contact Form  | <p>#1080: Autofill name and email address for a logged in user to avoid "Send me a copy" failure if email address only differs in letter case.</p> <p>In earlier releases if a logged in user accessed a contact form and ticked "Send me a copy" the system would not send a copy to an email address that differed only in letter case to the email address provided in their User profile. To reduce the likelihood of this happening, the contact form will now autofill the Name and Email Address fields in the form with the information from the logged in user's profile. The user may still change their email address on the form, in which case the former rules will still apply and a copy will not be sent if the provided email address differs from that in the user profile. This is to ensure that the "Send me a copy" facility can not be exploited to send emails to arbitrary addresses.</p> |
| Core          | #1081: Earlier releases included a block titled <i>u3a venue list</i> . This block has now been removed and will no longer appear in the list of available blocks.  |

### Known Defects or Limitations

**LiteSpeed Cache:** This is an ongoing issue, currently the plugin should not be activated. Detailed in OpenProject #972, Change Board Minute 11.

**Release Dated:** 14 October 2024
