

SiteWorks: Release Note

SiteWorks Import-Export 1.6.3; SiteWorks Core 1.1.6; SiteWorks Contact Form 1.1.3

23 November 2024

This update resolves a number of issues and adds additional minor features:

- Ensures consistency for u3a custom posts dashboard lists.
- Changes the the Group status text to "Waiting List"
- Resolves an error in the import export plugin regarding the non loading of plugin.php
- Add a non-mandatory phone number field to the contact form, together with a change to the message subject line.

Summary for Website Administrators: This update resolves an issue regarding the import-export plugin and adds a number of features to the contact form. The short form text *Wait List Only* in as a Group's status is changed to *Waiting list*.

It is important to note that the import/export plugin now uses the text "Waiting list" in place of "Wait list only" when importing from CSV files or exporting to CSV files. Hence any CSV file that contains the group status text "Wait list only" will no longer import successfully until the file is edited to use the new version of the text.

Release Consists of the Following Plugins

Compatible with: WordPress 6.7.1 **Theme:** u3a SiteWorks 1.9.8

TESTING NOTES

Core

1. All u3a custom post types are now consistent in which fields are shown by default in the dashboard lists.
2. Where the short form of the Group Status is used, the text formerly shown as *Wait List Only* now appears as *Waiting List*.
3. The Plugins dashboard page will show the plugin dependencies (needs WordPress 6.5 or later)

Import - Export

1. The import/export plugin now uses the text "Waiting list" in place of "Wait list only" when importing from CSV files or exporting to CSV files. Note that this means that any CSV file that contains the group status text "Wait list only" will no longer import successfully until the file is edited to use the new version of the text. The spreadsheet template guidance notes have been updated to reflect this change.
2. The Plugins dashboard page will show the plugin dependencies (needs WordPress 6.5 or later)

Contact Form

1. The form now includes a text field for an optional contact phone number
2. The email that is sent has the text "u3a enquiry: " prefixed to the subject line entered by the visitor.
