

# SiteWorks: Release Note

SiteWorks Core 2.1.2

31 March 2026

**Summary for Website Administrators:** The core has been updated to provide two additional features:

1. A single line option has been added to the event list block.
2. The ability to create a iCalendar (.ics) file is now available. This will allow the easy addition of a calendar to any site. It should be noted that to display the calendar a third party plugin is required.

## Release Consists of the Following Plugins

### New Features, Enhancements or Bug Fixes.

Plugin	Summary of Reason
Core	<ul style="list-style-type: none"> <li>• OpenProject #1165: Single line option for event list block .</li> <li>• OpenProject #1173: Create iCalendar (.ics) file from SiteWorks Event data.</li> </ul>

### Unreferenced Modifications ‡

Plugin	Summary of Reason
Core	Blocks defined in the code now user version 3 of the API for block registration as required by the upcoming WordPress 7.0

‡ Identified by the Development team either to optimise code or align the current *Theme* or plugins to the latest WordPress specifications.

### Known Defects or Limitations

None

### Additional Comments

The Core plugin will generate or update an iCalendar file whenever a new u3a Event is added or an existing u3a Event is edited.

The file is publicly accessible at the URL `{sitename}/wp-content/uploads/event_calendars/u3a_event_calendar.ics`. The file can be imported into any calendar system which accepts iCalendar (.ics) files. The ICS Calendar plugin has been used in testing - <https://en-gb.wordpress.org/plugins/ics-calendar/>

**Note:** Version 2.1.2 of the core supersedes 2.1.0 and 2.1.1 which were not be released

**Release Dated:** 30 March 2026
