Unreferenced Modifications ‡

Plugin	Summary of Reason
Configuration	Upload of zip archive files is now only rejected when the constant SITEWORKS_HOSTING is defined. This constant is defined in wp-config.php for all sites hosted on the Trust's hosting server, so this change would permit upload of zip files when WordPress is running in a different environment, such as when using 'Local' or other development system or when WordPress is hosted with another service provider.

‡ Identified by the Development team either to optimise code or align the current *Theme* or plugins to the latest WordPress specifications.
