u3a SiteWorks WordPress Configuration	1.2.2		

[§]Third Party Software plugins, version numbers outside the control of SiteWorks

New Features, Enhancements or Bug Fixes.

Plugin	Summary of Reason
Core	- OpenProject #1162: A bug associated with the 'Add Contact' form which has irregular field sizes on a narrow screen has been resolved. - OpenProject #1181: The issue where the Event list if limited by number, may select same day events out of order has been resolved.

Unreferenced Modifications ‡

Plugin	Summary of Reason
Core	Version 2.2.1 includes a substantial reworking of the source code that handles u3a Events with a view to making the code more straightforward to understand and easier to maintain. This should make no change to the functionality of the facilities for handling events but does mean that a thorough testing is requested.

‡ Identified by the Development team either to optimise code or align the current *Theme* or plugins to the latest WordPress specifications.

Known Defects or Limitations

None

Additional Comments

None

Release Dated: 17 July 2026
